Plaskova N.S.

Theory and practice of analysis of international financial statements.

Textbook – Urbana : Arrow Science & Technology, LLC – 2026. – 136 p.

The textbook introduces modern methods and techniques for analyzing the company's activities based on financial statements prepared in accordance with International Financial Reporting Standards. The chapters of the book describe the sequence of analysis of the financial situation, financial results, liquidity, solvency and investment attractiveness of the company. At the end of each chapter, there are questions for self-control. For students of higher educational institutions studying under bachelor's degree programs in financial management and accounting, and it will be interesting for practicing specialists of financial and analytical departments of companies in various business areas.
